ABSTRACT

Its maximum length is 250 words

Keywords: 2 to 6 keywords

MAIN TEXT

Deadline for submitting abstracts **has been extended until July 21st 2019**. There is no limit of maximum number of abstracts per author. The submission of abstracts, like the registration, is done through our webpage <https://www.conftool.org/latinmag2019/>. On this page you must register or login with your username and password. Once in your account, you must enter the option "your submission" and complete the form with the required information (Fig. 1). Afterwards, you must upload a pdf file using the format indicated in this document (Fig. 2).

The main text is free format; it is recommended but not compulsory that you include asides. It should start with a short introduction followed by a motivation or objectives, procedures or methodologies, results and conclusions at the end; each topic in separate paragraphs. Acknowledgments can be included in a paragraph or line at the end of the main text. The figures and / or tables referred to in the text must be added at the end of the text (1 on each page). A maximum of 4 elements per contribution will be accepted in any combination (4 figures, or 4 tables, 2 figures and 2 tables, etc). **Figures resolution should be between 150 and 200 dpi (or dpi).**

Start the paragraph without indentation, leave a blank line after each paragraph, use **the Times New Roman font with 11 points**, write in italics words of Latin origin, such as *et al.*, *e.g.*, etc. Use **line spacing paragraphs of 1.15** (like the one used here).

Figures and table captions must be included below the corresponding figure or table.

The maximum length of the text, including: Title, authors, affiliations, abstract / abstract, keywords / keywords, and figure and table captions **is 2300 words**.

References

The references in the text must be the strictly necessary, they must appear with the last name of the author (authors) and the year between parentheses:

- The general geochemical characteristics of the hot springs in this area were compiled by Pesce and Miranda (2003).

Or be included in parentheses:

- if there are 2 authors, they are separated by a comma: Values obtained from both magnetometers were reduced following the IAGA standards (Campbell, 2007; Yanowski, Sucksdorff, 1996).
- If there are more than 2 authors, the surname of the first one is followed by the phrase *et al.* in italics: ... a system of folded and run belts with N-S direction that evolved from the last 15 Ma (Limarino *et al.*, 1999; Winocur, 2010)

The list of references mentioned in the text must be included at the end in alphabetical order, following the corresponding format, as appropriate, for articles in journals [1], books and theses [2], memoirs [3], etc.
